k-hub.in New Search Feature

As you would have noticed, we have made certain changes in the k-hub.in e library platform.
A new search box has been introduced in the latest release of k-hub.in e library.
This search box works beyond the scope of the listed resources in your selected k-hub.in subject.
The search box leads to several resources including articles, dissertations, thesis, reports, presentations, datasets, etc. published by several universities, authors and researchers worldwide.

How to use the New Search Feature:

The new search feature is extremely easy to use. Listed below are the important aspects of the new search feature:

New Resources Page:

Enter search term and click on 'Search' button.

New Search Page:

Thesis   ← __Type of resource__

This thesis presents methods for novel image synthesis from cubic panoramas taken with multi-sensor cameras. The pre-captured cubic panoramas are used to interpolate arbitrary views to allow a virtual walkthrough of the remote real environment. In our approach, the "transfer" and "triangulation" methods are adopted to analyse the geometry of cubic panoramas and recover an accurate essential matrix between cubes. To generate a novel view between two aligned cubes, a warping model is applied to wa ...Read more

8. Filters are provided below the search box.

Filter 1. Title / Publisher / Country. Select the filters and click on any alphabet as required. For example: If you want to see titles published in India,

Select - Country->I. This will list all the publications published in countries starting with 'I'.

Filter 2. Resources. Select the resource type as required. For example: Click on e Journals to see a complete list of e Journals incorporated in the selected subject under k-hub.in e library.

Filter 3. Subject. Applicable for multiple subscriptions. Incase the institution has multiple subscriptions, the user can switch between the subjects.

Filter 4. Category. Applicable for e Journals. The category filter can be used to browse the list of e journals for a specific subject department. The category filter consists of all the departments of any selected subject. For example – Civil engineering, mechanical engineering, control engineering are all departments under the Engineering subject area in k-hub.in e library.

9. Resource type sorting. Applicable only for e journals.

This option lets users sort between Full text / Abstracts / Partial Access / Embargo resources. Clicking on the option shows a drop down list of the resource types. User can select whichever resource type they want to explore.
