

## **NURSING FOUNDATION LABORATORY INCLUDING ADULT HEALTH NURSING AND ADVANCED NURSING LAB (63.50 Sq. Mtr)**

The heart of nursing is skill based practice. Our Nursing Foundation Lab is the practical area of the students, where they perform all nursing procedures on mannequins prior to the exposure to the clinical field. Emphasizing on hands-on practice advance nursing, CPR mannequin is available in the nursing foundation laboratory so as to improve the skills and knowledge of students. The lab is equipped with ample surgical dissecting instruments, various articles and equipment to teach different procedures to the students before sending them to the clinical areas. Our Fundamental Lab has the provision for Objective Structured Clinical Examination (OSCE) and Objective Structured Practical Examination (OSPE). This preclinical practice helps the students to reduce the stress and fear of the initial exposure to the hospital environment.

### **AIMS**

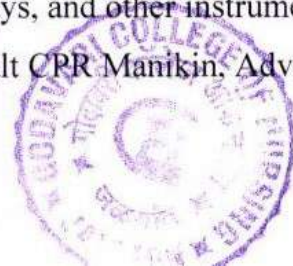

- To increase awareness among the students in the field of medicine to get a positive understanding between the doctor, nurse and patient in treating patient.
- For providing practical knowledge as a demonstration in the institutional set up itself without any barrier.

### **OBJECTIVES**

1. To demonstrate the procedures prescribed in the syllabus by the teacher.
2. To prepare themselves for the practical procedures.
3. To re-demonstrate the procedures and be thorough before the actual clinical practice
4. To explain the basic concept of conceptual and theoretical models of nursing.

### **FACILITIES**

The lab is well furnished and well ventilated with all the necessary equipment like patient beds, mattresses, bed sheets, bedside locker, linens and blankets, towels, bed cradle, cardiac table, wheel chair, stretcher, critical care unit( with O2 cylinder with flow meter, CPR dummy and Suction apparatus), different sizes procedure trays, and other instruments. Mannequin available are Adult Male 3 Adult Female 5 Adult CPR Manikin, Advanced IV

Arm, Catheterization Trainer (Male & Female), Ostomy Care Simulator, Airway suction trainer. All the equipments are as per INC requirement and sufficient for each nursing course.

- There is one dummy of hand with visible veins which is being used to study the procedure of introducing IV cannula and injection.
- There are charts and models displayed which are prepared by the Nursing students like dialysis machine, IV infusion pump, defibrillator, PTCA, nursing theories etc. There is also a well-equipped ideal patient unit with ICU set up.

## **ACTIVITIES**

- Initially teacher takes lecture and demonstration on various procedures. Then the students are divided into groups and are made to practice all basic nursing procedures like BP, TPR, bed bath, hair care, mouth care, urine albumin and sugar test, CPR, IV cannula insertion, IV therapy, etc. under supervision before they could perform those procedures on live patients.
- Demonstration & return demonstration of procedures
- Conduct of Objective Structured Clinical Examination(OSCE)
- Conduct of general physical examination and system assessment
- They are used to study the instruments which are used in hospitals, tray set up, maintaining aseptic technique during the procedure, etc.
- They are allowed to issue the articles for the procedure.
- All these activities are done for encouraging the students to be a functional nurse.

## **MATERNAL AND CHILD HEALTH LABORATORY (68.74 sq mtr) (33.34 sq. mtr)**

- **OBSTETRIC AND GYNECOLOGY SKILL LAB**

The OBGY Nursing Skill and Simulation Laboratory are here to make the student's clinical experience educational and enlightening and to promote empowerment of the student. Scenarios and simulation experiences relate to the OBGY Lab.

### **GOAL**

The goal of the OBGY Nursing Skill and Simulation Laboratory is to promote safe, knowledgeable and effective nursing care by demonstrating and reinforcing the highest level of performance and readiness.

### **OBJECTIVES**

Students will be oriented to simulations instructions prior to running a scenario. If the student is not comfortable, learning will not take place and scenario objectives may not be met. Simulations and case scenarios mimic the clinical setting and are designed to help the student develop problem-solving and decision making skills. Simulations include all environmental factors to make students' learning realistic and authentic. These simulations help students think on their feet and help the transition from lab to clinical. For an enhanced learning experience, students must come to the lab prepared. The faculty will provide debriefing and positive feedback; students will self-analyze their performance and use critical thinking during the reflection process.

### **OBGY NURSING SKILL LABORATORY'S ACTIVITIES:**

Upon completion of the laboratory rotations the students will be competent in performing different procedures through using different models & simulators available in the OBGY skill lab and they will be able to:

- Identify the anatomical parts in both male & female reproductive system through using models (bony pelvis & soft tissues) and video tapes.
- Identify different stages of fetal development using different fetal development models.
- Perform complete physical assessment for women during antenatal period through using full body simulator and other lab resource as CTG, video tapes (plasma screen) and posters.

- Assess the parturient physical condition & the progress of process of normal labor through using interactive childbirth simulator, and different models available in the lab.
- Perform complete physical assessment for women during post partum period through using full body simulator & childbirth simulator.
- Prepare delivery set and instruments and equipments needed during labor.
- Use the full body pregnant simulator to demonstrate the different fetal positions attitudes, lies, and presentations.
- Use different interactive childbirth scenarios during labor to help students to formulate nursing care plane according to each scenarios.
- Perform physical examination & resuscitation for the newborn using interactive childbirth simulator.
- Assess any division from normal during normal labor using interactive child birth simulator scenarios, ultrasound scanning which it also can be used to demonstrate any emergency situation as postpartum hemorrhage or shock
- Assess female genital system to help students dealing with women having any gynecologic problem.
- Identify different instruments used for gynecologic women.
- Apply universal infection control precautions & safety measures while providing care to the women during antenatal, labor & postpartum, Newborn, as well as women who have any gynecological problem.

### List of procedures included in OBGY. Lab

I. Ante-Natal Procedures	<ol style="list-style-type: none"><li>1. Physical Examination during Pregnancy</li><li>2. Breast Examination</li><li>3. Leopold's Maneuver</li><li>4. Auscultation of fetal Heart Rate</li><li>5. Determination of PMI (Point of maximum impulse) of FHR (fetal heart rate) Evaluation</li><li>6. Application of the External Monitor</li></ol>
II. Labor & Delivery Procedures	<ol style="list-style-type: none"><li>1. Timing uterine contractions during labor</li><li>2. Straight Catheterization</li><li>3. Performing intra-partal Vaginal Examination</li><li>4. Placental Examination</li></ol>
III. Postpartum Procedures	<ol style="list-style-type: none"><li>1. Physical Examination during postpartum period</li><li>2. Breast care</li><li>3. Postpartum Fundal Assessment</li><li>4. Postpartum lochial Assessment</li><li>5. Postpartum perineal Assessment</li><li>6. Perineal Care or Perineal Swabbing</li></ol>
IV. Gynecologic Procedures	<ol style="list-style-type: none"><li>1. Assessment of female genitalia</li><li>2. Vaginal irrigation or vaginal douche</li><li>3. Insertion of vaginal suppositories</li><li>4. Pre-operative care of the gynecologic patient</li><li>5. Post-operative care of the gynecologic patient</li></ol>

## **CHILD HEALTH/PEDIATRIC NURSING LAB**

The Child Health Nursing lab provides nursing students with an additional learning resource to meet their educational and academic goals. The lab is equipped with supplies and equipment, as well as practice manikins including Baby Simulator, Pediatric manikins, CPR manikins, Physical examination manikins, as well as high fidelity child simulator. The lab provides students with a realistic, simulated clinical environment to practice and demonstrate competency of selected nursing skills.

Clinical training in Pediatric Lab equips students with essential knowledge, skills, and attitude needed to provide accurate, safe, and comprehensive nursing care for normal child. Training in such fields of nursing enables student to function within the framework of family centered care.

### **AIMS**

To appreciate the Concepts and principles of Child Health Nursing.

### **GOALS**

- The aims of the Child Health Nursing Laboratory is to promote safe, knowledgeable and effective nursing care by demonstrating and reinforcing the highest level of performance and readiness.
- Provide quality education in child health nursing to students with high scientific and clinical competencies.
- Utilize concepts from humanities and behavioral sciences in nursing practice.
- Practice legal and ethical standards in child health nursing profession.

### **OBJECTIVES**

1. To acquire knowledge and skills in reducing nursing care to normal.
2. To develops skills in managing normal and high risk neonates and participate in family welfare programme.
3. To develop ability and skill for providing nursing care to child.
4. To reinforce learning through practicing Child Health procedures.

## **COMMUNITY HEALTH NURSING LABORATORY (35.11sq mtr)**

Community Health Nursing (CHN) is the community oriented primary health care programme and the integration of community with the primary health care of individual and community. The aim of the CHN lab is to train the students to render comprehensive care to the individual, family and community and to practice the same in actual community health management. Community lab is used for the community based teaching activities. To carry out procedures in the community, the articles and AV aids are preserved in the lab.

### **OBJECTIVES**

- To render comprehensive care to the individual family and community.
- To be able to involve in community participation.
- To develop IPR with the village leaders, community and other agencies.
- To organize, assist and conduct health camps.
- To organize, assist and conduct the school health and child health programme.
- Facilities
- The community lab is well equipped and furnished with healthy environment for learning.
- The lab consists of the all equipment for providing the basic care in terms of primary health care like community bag, Maternity kit, sphygmomanometer, family welfare kit.
- The lab is arranged in such a manner that the student can practice the procedures effectively.
- The college is providing all the necessary articles to the students for their better understanding.

### **FACILITIES**

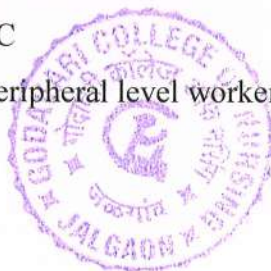

- community lab is proper equipped and well furnished with healthy environment of learning.
- The lab consist of the all equipment for providing the basic care in term of primary health care like community bag, Maternity kit and others.

- The lab is arranged in such a manner that the student of the nursing programme can practice the procedure and make their effective A.V aids by using various charts displayed in community health care and education programme for raising the health status of individual.
- The college is providing all the necessary articles to student for their better understanding.

## ACTIVITY

1. Develop art and skills of community assessment:
  - Survey the community and families
  - Identify the community health needs.
  - Identify the available resources to meet the needs.
2. Provide comprehensive health and nursing care to families:
  - Select 5 families and identify the health needs
  - Create awareness of health and help them to take care of themselves
  - Use problem solving approach while providing care
  - The first and foremost training imparted to the students is bag technique in which students are trained for assessments at home settings.
  - These assessments include antenatal care, post-natal care, new born assessment, infant, toddler, preschoolers, adolescents, adults and elderly.
  - Apart from bag techniques, students are taught for hemoglobin analysis using either Sahl's Hemometer or Hemocheck. Random Blood Sugar Testing are conducted in home settings for people with diabetes mellitus.
  - In addition to these facilities, the community health nursing laboratory also has delivery kit to use whenever there is requirement in the community.
3. Understand the organization of peripheral health service
  2. Study the structure and functions of PHC
  3. Study the roles and responsibilities of peripheral level workers.

4. Develop beginning skills in conducting education for peripheral workers and community members

- Select suitable peripheral workers and members of the community.
- Select the topics according to the needs of the community.
- Plan the progress of in service education.
- Conduct the in service education at suitable place.

## NUTRITION LAB (56.25sq.mtr)

The Nutritive laboratory is used by students for learning basic cooking skills, and learning about how the culture influences on nutritive value of foods. Students also use the laboratory for modifying recipes to meet special recommended dietary allowance of food and learn therapeutic diet to gain optimum health.

### AIMS

- To gain knowledge of nutrition and nutritive value of food for maintenance of good health for improve quality of life and it is also useful for practice of nutrition.
- To made different types of therapeutic diet by follow the principles of food preparation.

### OBJECTIVES

- To discuss the relationship between nutritive value and its effects on human life.
- To discuss the types, functions, sources, ingredients and recommended daily allowance of macro nutrients and micro nutrients.
- To explain the sources, Functions, safe and daily requirements of water and other electrolytes to keep body hydrated.
- To explain relationship in between National Nutritional Programmes and Nutrition in term of gaining optimum health.
- To use of cooking skill in the preparation of food.
- Safe and water sanitation use while preparing food to prevent diseases.

### FACILITIES

- Well ventilated and well furnished nutrition Laboratory we have with adequate space.
- We have Articles in nutrition Lab. Like Mixture, Dinner Set, gas, weighting machine, Nutritive charts and posters and wash basin.

## ACTIVITIES

- To introduce the students about cooking skill and technique and Preservation of nutrients.
- To give knowledge to students how to preserve foods
- To prepare and serve different types of nutritive foods.
- To give knowledge regarding about principles, methods of cooking and how to serve foods.
- To enhance knowledge regarding calculation of calories for different categories of people.
- To learn well balanced diet food

## SKILL LAB

The lab is open and equipped for your ongoing nursing proficiency practice needs. You will perform. Skill labs play a key role in nursing and paramedical training quality assurance. simulated practice until you have mastered the skill/procedure to the point where you can pass your return demonstration and safely perform the skill/procedure in the clinical setting. Skills laboratory prepares nursing students for their clinical placement and helps them to practice a scenario using the nursing skills countered in their workplace environment. It is described as a practice room, equipped with training facilities offering students in the medical field a safe environment to practice their clinical skills before the actual application. With that, it should be well established as it will support and facilitate students' psychomotor learning.

### AIM AND OBJECTIVES

- The advance skill lab aims at teaching and training students the essential advance nursing skills.
- to provide overarching care for adult patients suffering from variety of disease conditions.
- It prepares nursing graduates qualified in the care of the adult patient according to the highest standards of nursing care.
- This lab also provide hands on learning experiences specific to course objectives as directed by the nursing curriculum.
- A basic patient care unit is developed with all foundation procedure to be performed.
- The lab is well structured with all standard procedures required for each nursing care plan.
- Improves Teamwork and Communication Skills
- Enhances Problem-Solving Abilities

## **FACILITY**

Central Venous cannulation trainer, Airway Management Simulator, Advanced IV Arm, CPR, Defibrillator, ECG Simulator are available for students to practice various procedures. Here, procedural skills are trained, repeatedly practiced, and evaluated until the required minimum standards for patient treatment is ensured

## **ACTIVITY**

Simulation laboratory is an intricate part of student learning. It provides a foundation for critical reasoning, synthesis, and analysis of increasingly complex care scenarios. Simulation lab is home to a variety of stimulant patient ranging in age from infant to adult, male and female, and pregnant mannequin that can deliver her baby. Simulation helps to develop different scenarios requiring the use of both clinical skills and critical thinking skills by nurses, in order to solve problems.

## **PRE-CLINICAL SCIENCE LABORATORY**

In medical education, this term is applied to the disciplines that traditionally have been studied before students are introduced to patient care, comprising the natural and biological sciences, gross and microscopic anatomy, biochemistry, cell biology, genetics, physiology, microbiology, and sciences at the interface with clinical studies, pathology, pharmacology, and epidemiology.

Pre clinical sciences laboratory is designed to enable the students to acquire knowledge of the anatomical structure and functions, biochemical composition and its alteration of the human body system. This lab also provides the opportunities for the students to identify the micro-organism and practicing infection control methods.

It is well-equipped with models & specimens, all the bones, skeleton & subject related charts etc. The students are encouraged to use this lab to learn anatomy of bones& joints & other systems.

The lab is prepared to reinforce the theory knowledge about human anatomy, physiology, biochemistry, pathology and microbiology with the help of articulated skeletons, various bones, models & charts. The models and specimens in the lab help students to gain knowledge and the “hand touch feel” of the structure and function of the human body. The lab has excellent infrastructure forming the basis of deeper understanding of body functions.

### **AIMS AND OBJECTIVES**

- To acquire theory knowledge about the normal structure of human body system.
- To acquire knowledge of the normal physiology of various human body system.
- To understand biochemical composition and its alteration of the human body system.
- To provides the opportunities for the students to identify the micro-organism and practicing infection control methods

## **FACILITIES**

- In our institute the Labs. having proper lighting and good ventilation.
- The anatomy and physiology lab consist of all the equipment such as adult human articulated skeleton, adult skull, pelvic, heart with large blood vessels, eye with different section, ear with different section, full set of disarticulated adult human skeleton, specimen like gall bladder with gall stones, cyst, appendix, normal uterus, placenta, uterus and sub mucus fibroid etc...and different charts of all the systems.
- The lab is well furnished in such a way that the students are able to acquire their knowledge through their different demonstration.

## COMPUTER LAB

Computer lab is equipped with 30 computers with Internet facility. During their course of training the students are given practical sessions to work on computers under the expert guidance of our Computer teachers. They practice to work with various software. Prior to clinical exposure, students perform procedures repeated in the laboratory so that they become well versed while carrying out the procedure in the clinical setting

### AIMS

- To develop basic understanding of uses of computer and its Applications in nursing.

### OBJECTIVES

- To identify and define various concepts used in computer.
- Identify application of computer in nursing.
- Identify features of computer aided teaching and testing.
- Demonstrate use of internet and email.
- Describe the use of hospital management system.

### FACILITIES

- We have a well furnished and well ventilated computer lab.
- There are thirty five computers in our lab.
- There is separate cabin for staffs and students.
- There are sufficient chairs and air conditioning system is available.
- Internet facility is also available in our computer lab.

### ACTIVITIES

- They are using the internet facility for reference purpose.
- They improve their knowledge in the application of computer in nursing.
- They improve their skills about computer.
- They improve their knowledge in hospital management system
