Introduction

The Department of Medical Surgical Nursing (MSN) and the Department of Fundamentals of Nursing (FON), Godavari Nursing College, Jalgaon, organized a Two-Day Training Programme on Basic Life Support (BLS), Advanced Cardiac Life Support (ACLS) and Pediatric Life Support (PLS) on 28th and 29th Sep 2026 at Akshata Patil Hall. The programme was designed to strengthen the knowledge, clinical skills, confidence and competency of nursing students in recognizing and managing life-threatening emergencies. Since nurses are frequently among the first healthcare professionals to respond to emergencies, competency in cardiopulmonary resuscitation and emergency life-support measures is an essential component of professional nursing practice.

Objectives of the Programme

The major objectives of the training programme were to develop knowledge regarding BLS, ACLS and PLS; strengthen understanding of the anatomy and physiology of the heart and lungs; develop competency in recognizing cardiac arrest, respiratory emergencies and other life-threatening conditions; train students in high-quality CPR and AED awareness; introduce principles of advanced cardiac emergency management; develop awareness of pediatric emergency response; provide hands-on manikin-based practice and return demonstrations; assess learning through pre-test and post-test evaluation; and enhance confidence and preparedness for emergency situations in clinical settings.

Day One – 28th September 2026

The first day was organized for B.Sc. Nursing 3rd Semester, GNM 2ND Year, M.Sc. Nursing 1st Year students and staff nurse. The programme commenced with a formal welcome address, followed by the felicitation and introduction of the Chief Guest, Dr. Vaibhav Patil Sir, and the resource persons, Mrs. Rubina Cambell and Ms. Steffy Abraham. A pre-test was conducted to assess the participants' baseline knowledge regarding BLS, ACLS and emergency care.

A detailed academic session on the Anatomy and Physiology of the Heart and Lungs was conducted to provide a strong foundation for understanding cardiac and respiratory emergencies. The students were then introduced to the principles and procedures of BLS, including recognition of cardiac arrest, initiation of CPR, chest compressions, ventilation and coordinated emergency response. Special emphasis was given to high-quality CPR, appropriate compression technique, minimization of interruptions and effective teamwork during resuscitation.

The ACLS session covered the systematic approach to cardiac emergencies and relevant emergency-management principles. An AED demonstration was also conducted, with orientation regarding its role in emergency cardiac care. The theoretical sessions were followed by hands-on practice on manikins, where students performed return demonstrations under expert supervision. The day concluded with a post-test to assess learning.

Day Two – 29th September 2026

The second day was conducted for GNM 2nd Year students. The programme followed a structured training methodology comprising a pre-test, theoretical teaching, demonstrations, practical skill practice and post-test assessment. Students received instruction on BLS, ACLS and Pediatric Life Support, with emphasis on early recognition and immediate intervention during life-threatening emergencies.

The resource persons demonstrated essential emergency-care procedures, including CPR techniques, emergency response, airway-management principles, AED awareness and coordinated resuscitation. The pediatric life-support component focused on developing awareness and appropriate response to emergencies involving pediatric patients. Students actively participated in manikin-based practice and performed return demonstrations under expert supervision. The training concluded with a post-test to assess the knowledge gained during the session.

Teaching and Learning Methodology

The programme incorporated interactive lectures, PowerPoint-based presentations, demonstrations, manikin-based skill practice, return demonstrations, question-and-answer sessions, pre-test and post-test assessment, expert guidance and individual feedback.

Participation and Beneficiaries

A total of 280 nursing students benefited from the two-day training programme.

Outcomes of the Programme

The training programme contributed to improved understanding of BLS, ACLS and PLS principles; improved knowledge of cardiac and respiratory emergencies; development of competency in high-quality CPR; increased awareness regarding AED use; increased confidence in responding to emergency situations; practical exposure through hands-on manikin practice; development of teamwork and coordinated response during resuscitation; reinforcement of early recognition and timely intervention; and improved readiness to manage emergencies in clinical settings.

Role of the Resource Persons

Mrs. Rubina Cambell and Ms. Steffy Abraham played an important role in facilitating the training programme. Through theoretical sessions, demonstrations, practical guidance and feedback during return demonstrations, they supported students in developing essential emergency-care competencies. Their practical and interactive approach made the sessions informative, participatory and skill-oriented.

Role of the Departments

The Department of Medical Surgical Nursing (MSN) and the Department of Fundamentals of Nursing (FON) jointly coordinated the programme. The departments ensured effective planning, organization, student participation, coordination with resource persons and smooth conduct of theoretical and practical sessions. The programme reflected the institution's commitment to competency-based nursing education and clinically relevant skill training.

Conclusion

The Two-Day Training Programme on BLS, ACLS and PLS was successfully conducted at Godavari Nursing College, Jalgaon, on 28th and 29th Sep 2026. The programme provided students with valuable theoretical knowledge and practical exposure to emergency life-support procedures. Active participation in demonstrations, hands-on practice and return demonstrations helped strengthen students' confidence and preparedness to respond to life-threatening emergencies.

The programme concluded with a formal Vote of Thanks expressing gratitude to the Chief Guest, resource persons, college authorities, faculty members, organizing departments and participating students for their valuable contribution to the successful completion of the programme. Overall, the training was informative, interactive, skill-oriented and academically beneficial, and served as an important initiative towards strengthening emergency-care competencies among nursing students.
