## GOALS

- Ensure patient safety by reducing errors, infections, and preventable harm
- Improve quality of care through evidence-based nursing practices
- Enhance patient outcomes and satisfaction
- Promote professional accountability for nursing actions and decisions
- Strengthen legal and ethical nursing practice
- Improve accurate documentation and communication
- Encourage continuous learning and skill development
- Support teamwork and coordinated care
- Increase efficiency and proper use of resources
- Build trust between patients, families, and healthcare providers

## PURPOSES

- To protect patient safety and prevent avoidable harm
- To ensure consistent, high-standard nursing care
- To promote ethical and legal nursing practice
- To improve patient health outcomes and satisfaction
- To reduce medical errors and negligence
- To strengthen nurses' professional responsibility and integrity
- To support effective communication and documentation
- To enhance trust between patients, families, and nurses
- To encourage continuous quality improvement in healthcare
- To support accountability to patients, institutions, and society

## OBJECTIVES

- Define quality and accountability in nursing practice
- Apply evidence-based standards to improve quality of patient care
- Demonstrate accountability for nursing actions, decisions, and outcomes
- Identify and prevent errors in clinical nursing practice
- Maintain accurate and timely documentation
- Adhere to legal, ethical, and professional guidelines
- Promote patient safety and risk reduction strategies
- Communicate effectively within the healthcare team
- Participate in quality improvement activities
- Enhance patient satisfaction and trust through responsible care
