REPORT ON
FACULTY AWARENESS AND SAFETY PROGRAM ON THE USE OF
GAS SAFETY DEVICE FOR DOMESTIC CYLINDERS

- **DATE:** 14/06/2024
- **TIME:** 10:00 AM
- **VENUE:** Godavari College of Nursing, Jalgaon

- **INTRODUCTION:**

The Department of Fundamental of Nursing organized a Faculty Awareness and Safety Program focusing on the use of gas safety devices for domestic cylinders. Given the importance of safety in handling gas cylinders within households, this program aimed to equip faculty members with essential knowledge and practices to ensure the safety of themselves and their families.

- **OBJECTIVE:**

The primary objective of the program was to raise awareness among faculty members about the importance of using gas safety devices for domestic cylinders. It aimed to educate them on the potential hazards associated with gas leaks and how proper safety measures can mitigate such risks. Additionally, the program aimed to demonstrate the correct usage of gas safety devices to ensure maximum effectiveness.

- **DESCRIPTION:**

The program commenced at 10:00 AM with an introduction by the organizing committee, outlining the objectives and agenda for the day. This was followed by an informative session led by experts in gas safety, who provided insights into the various types of gas safety devices available in the market and their functionality.

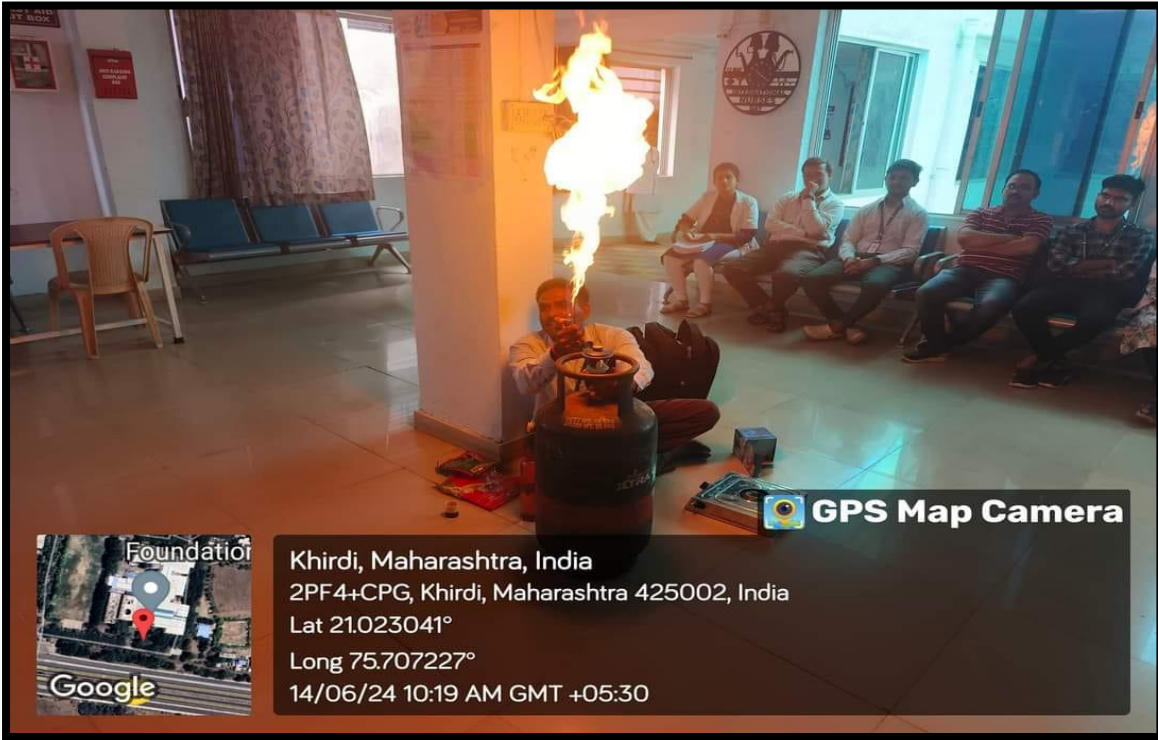

Participants were educated about the signs of gas leaks and the immediate steps to take in such situations to prevent accidents. Practical demonstrations were conducted to illustrate the proper installation and usage of gas safety devices, emphasizing the importance of regular maintenance and inspection.

Interactive discussions were encouraged throughout the program, allowing faculty members to raise queries and share their experiences related to gas safety. Real-life scenarios were presented to highlight the significance of adhering to safety protocols and being prepared for emergencies.

- **CONCLUSION:**

In conclusion, the Faculty Awareness and Safety Program on the Use of Gas Safety Device for Domestic Cylinders proved to be highly beneficial in enhancing the knowledge and awareness of faculty members regarding gas safety measures. By equipping them with the necessary information and practical skills, the program aimed to promote a culture of safety consciousness within the college community. It is hoped that the insights gained from this program will not only benefit the faculty members personally but also enable them to educate and influence others in adopting safe practices in handling domestic gas cylinders.
